ADVANCED REFRIGERATION SEMINAR

The advanced refrigeration seminar has been designed for those with knowledge and or experience in the HVAC field. This advanced level of training provides knowledge in the controls and wiring of refrigerated units, identifying specific problems that do not commonly exist in HVAC systems.

Refrigeration system technicians require a higher level of training than HVAC technicians. The basics of HVAC knowledge are an essential for understanding the thermodynamics of the refrigeration system but the issues that can be encountered are more complex when dealing with lower temperature equipment.

Some of the topics covered in this seminar are:

- ✓ High voltage controls
- ✓ Accessories required in medium and low temperature applications
- ✓ Methods of defrost
- ✓ Evaporator fan control
- ✓ Refrigeration system shutdown
- ✓ Controls necessary for outdoor cold weather operation
- ✓ Refrigerants used in low and medium temperature applications

**24-HOURS OF
CLASSROOM AND LAB TRAINING**

\$525

3 SCHEDULES TO CHOOSE FROM

Daytime for 3 days (8 a.m. to 5:00 p.m.)

Evenings for 8 days (6 to 9 p.m.)

Saturdays for 3 days (8 a.m. to 5:00 p.m.)

**TO REGISTER FOR THIS EVENT, PLEASE CONTACT
